EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Sheetal Patel on 11/9/09.

The application has been amended as follows:

Claims 1-2, 6-7, 9, 14-27 have been cancelled.

Title was amended to read as follows:

METHODS FOR PRODUCING ~~HIGH PERFORMANCE~~ SILICON CARBIDE
~~FIBERS, ARCHITECTURAL PREFORMS, AND HIGH TEMPERATURE~~
~~COMPOSITE STRUCTURES~~

Claim 3 has been amended to read as follows:

(Currently Amended) A method for producing high-strength ceramic fibers and ceramic fiber architectural preforms with an in-situ grown coating on each fiber surface with a composition different than that of a bulk fiber, comprising: preparing an original sample composed of an architectural preform formed from an as-produced high strength ceramic fiber type, **wherein the fiber composition is based on silicon carbide**, and wherein the architectural preform comprises at least one of a finite section of a continuous-length multi-fiber tow, a two-dimensional textile-formed fabric, and a three-dimensional textile-formed

Art Unit: 1791

complex-shaped preform;
placing the original sample in a processing furnace; and
thermally treating the original sample in the processing furnace at a processing temperature and a hold time of five hours or less in a processing gas having a composition, a pressure that is greater than 1 and less than or equal to 40 atmospheres, and a flow rate, wherein
the fiber composition, the processing temperature, the hold time, the gas composition, the pressure, and the flow rate are preselected to allow atomic decomposition from the surface of each fiber with reduced loss in an average tensile strength of the fibers within the thermally treated sample.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: the primary reason for allowance is that the cited prior art fails to disclose or reasonable suggest making a preform by providing a processing gas having the claimed pressures with a flow rate. As noted by applicant in the Interview held on 11/9/09, the cited prior art does not provided a flow rate for the glass that would allow it to achieve the claimed pressure. The cited art is silent in regards to providing a flow rate to the processing gas and the claimed pressures.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
